"While You Chart" Training Software

1

Highlights of Grid Charting

- Create 30 high quality notes in 30 minutes.
- Use or customize templates to document for
 - medical necessity,
 - contract compliance,
 - clinical thoroughness
 - risk mitigation
 - different diagnoses & treatment methods.
- Learn about best charting methods
 - CBE - Charting by Exception (to the normal)
 - ADPIE - Assessment, Diagnosis, Planning, Intervention, Evaluation

2

True Story 1...

A psychotherapist posted a message on a listserv stating she was audited by a Healthplan. She sent the requested records.

Many months later she received a letter stating that,

... my progress notes were not thorough enough, and they want ALL the money back from my work with that client.

Her response was,

Is that even a real thing? A really good scam? Do I have any recourse? They insist I have to pay it all, even if I want to contest it. That is a lot of money.

3

True Story 4 ...

The patient

"... has been ordered to sign an "Order for Parent Coordination" that includes a provision for the parent coordinator to have access not only to the children's mental health notes past and present, but the parents' as well."

"...I can see why one of these parents is freaked out, especially because she is being asked to release all of her mental health records (past, not just during divorce to this "coordinator."

4

Why are audits going to increase?

There are no longer annual limits on the number of psychotherapy sessions.

According to the U.S. Office of General Accounting the demand for mental health services is going to increase by 30%.

The pandemic experience has increased public eagerness for psychotherapy services.

Payers have financial pressures due to increase in overall healthcare expenditures: aging population, pandemic service demands, more medical service options of many types.

The only way to manage costs is to audit to assure the record is complete, and services are medically necessary.

GRID Charting & Training (c) Mentor Research Institute

5

5

What are the rationales for a payer's demand for repayment? i.e. clawback

- Record deficiency
- Improper coding
- Insufficient proof that service was provided
- No treatment plan
- Substandard progress notes
- Failure to demonstrate care is medically necessary and appropriate
- Charging for services that are not necessary
- Failure to provide empirically supported or evidence-based services
- Need to supplement the records.

You must go through the entire administrative process if they send a demand letter.

GRID Charting & Training (c) Mentor Research Institute

6

6

“What percentage of my patient records would not pass an audit?”

Ask yourself!

7

GRID Charting & Training (c) Mentor Research Institute

7

“What percentage of my patient records do not have a formal written treatment plan?”

Ask yourself!

8

GRID Charting & Training (c) Mentor Research Institute

8

What is required in a chart note to submit a claim to a health plan payer and not commit fraud?

Do I really know?!

9

Take a moment and ask yourself this question.

GRID Charting & Training (c) Mentor Research Institute

9

How many hours could it take to create a treatment plan and 30 chart notes that will pass an audit by any payer?

Ask yourself!

10

GRID Charting & Training (c) Mentor Research Institute

10

How much time is required to create 30 **low-quality** chart notes?

- 20 minutes = 1 treatment plan
- 5 minutes = 1 chart note
- 10 minutes = 5 treatment plan revision

154 minutes = $20 + (5 \times 29) + 50$

3 hours 54 minutes

Documentation will **NOT** pass an audit.

GRID Charting & Training (c) Mentor Research Institute

11

How much time is required to create 30 **high-quality** chart note?

- 20 minutes = 1 treatment plan
- 10 minutes = 1 chart note
- 5 minutes = 1 treatment plan revision

460 minutes = $20 + (10 \times 29) + (5 \times 30)$

At least **7 hours 43 minutes** required to create a treatment plan and 29 chart notes.

Documentation **MAY** pass an audit if you meet the necessary criteria.

GRID Charting & Training (c) Mentor Research Institute

12

GRID Charting & Training (c) Mentor Research Institute

15

15

Bottom Line

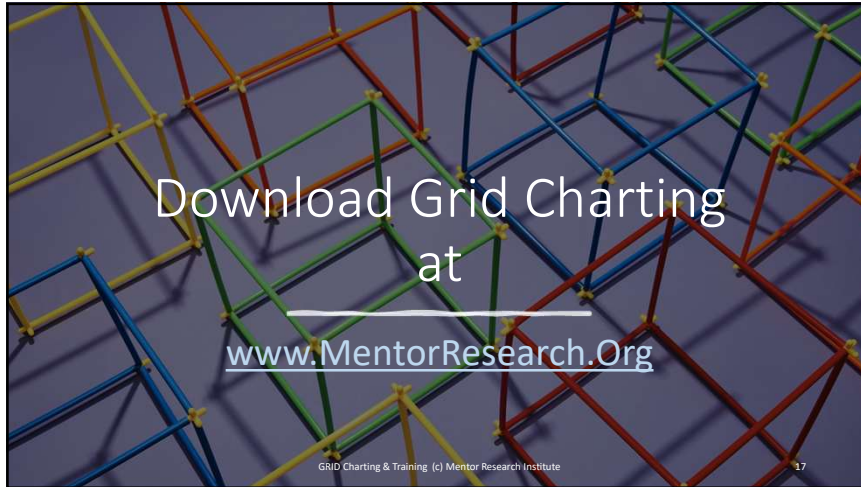

- State and federal laws require psychotherapists to document “minimum necessary” information for legitimate medical purposes in the patient’s medical record .
- Psychotherapists can keep notes that include private, personal and sensitive information for assessment and process purposes in psychotherapy notes.
- Healthcare providers may view a lawful medical record. Patients and auditors are entitled to view the designated medical record.
- Patients and auditors can’t tell the difference between a chart created by the psychotherapist or one created using charting simulation software.
- Charting has no clinical value and does not improve outcomes.

46

Are Fraud, Waste, or Contract Abuse Unethical?

Ethical issues!

1. Failure to document medical necessity.
2. Providing service that is not medically appropriate.
3. Failure to justify a diagnosis.
4. Providing services that are not evidence or empirically based.
5. Providing services for symptoms and problems that are not covered by the payer.
6. Failure to create a treatment plan.
7. Billing for services that are not necessary.
8. Payment was for services the provider cannot prove were provided.

U.S. Department of Health and Human Services
Office of Inspector General

<https://oig.hhs.gov/fraud/medicaid-fraud-control-units-mfcu/>

Medicaid Fraud Control Units

Medicaid Fraud Control Units (MFCUs) investigate and prosecute Medicaid provider fraud as well as abuse or neglect of residents in health care facilities and board and care facilities and other health care facilities in noninstitutional or other settings. MFCUs operate in each of the 50 States, the District of Columbia, Puerto Rico, and the U.S. Virgin Islands. MFCUs, usually a part of the State Attorney General's office, employ teams of investigators, attorneys, and auditors; are constituted as single, identifiable entities; and must be separate and distinct from the State Medicaid agency. OIG, in exercising oversight for the MFCUs, annually recertifies each MFCU, assesses each MFCU's performance and compliance with Federal requirements, and administers a Federal grant award to fund a portion of each MFCU's operational costs.

48

MEDICAID/MEDICARE

OAR 410-120-1280
Billing

- (4) For Medicaid covered services, the provider must not:
 - (a) Bill the Authority more than the provider's usual charge (see definitions) or the reimbursement specified in the applicable Authority program rules;
 - (b) Bill the client for missed appointments. A missed appointment is not considered to be a distinct Medicaid service by the federal government and as such is not billable to the client or the Authority;
 - (c) Bill the client for services or treatments that have been denied due to provider error, except as authorized under section (5) of these rules. Examples of provider error could be things such as required documentation not submitted for a prior authorization, or a prior authorization not submitted.
- (5) Providers may only bill a client or a financially responsible relative or representative of that client in the following situations:
 - (a) The client did not inform the provider of their Oregon Health plan I.D., MCE I.D card, or third-party insurance card, or gave a name that did not match OHP I.D. at the time of or after a service was provided; and therefore, the provider could not bill the appropriate payer for reasons including but not limited to the lack of prior authorization, or because the time limit to submit the claim for payment has passed. The provider shall verify eligibility at the time of service pursuant to OAR 410-120-1140 and prior to billing or collection pursuant to OAR 410-120-1280 and document attempts to obtain coverage information prior to billing the client;
 - (b) The client became eligible for benefits retroactively but did not meet all of the other criteria required to receive the service;

Civil Division Home

THE FALSE CLAIMS ACT

Many of the Fraud Section's cases are suits filed under the False Claims Act (FCA), 31 U.S.C. §§ 3729 - 3733, a federal statute originally enacted in 1863 in response to defense contractor fraud during the American Civil War.

The FCA provided that any person who knowingly submitted false claims to the government was liable for double the government's damages plus a penalty of \$2,000 for each false claim. The FCA has been amended several times and now provides that violators are liable for treble damages plus a penalty that is linked to inflation.

In addition to allowing the United States to pursue perpetrators of fraud on its own, the FCA allows private citizens to file suits on behalf of the government (called "qui tam" suits) against those who have defrauded the government. Private citizens who successfully bring qui tam actions may receive a portion of the government's recovery. Many Fraud Section investigations and lawsuits arise from such qui tam actions.

The Department of Justice obtained more than \$2.2 billion in settlements and judgments from civil cases involving fraud and false claims against the government in the fiscal year ending Sept. 30, 2020. More information about those recoveries can be found here and the 2020 FCA statistics can be found here.

Health Care Fraud (Federal, State & Private)

1. Health Care Fraud, § 18 U.S.C. 1347. Section 1347 states:

- (a) Whoever knowingly and willfully executes, or attempts to execute, a scheme or artifice-
 - (1) to defraud any health care benefit program; or
 - (2) to obtain, by means of false or fraudulent pretenses, representations, or promises, any of the money or property owned by, or under the custody or control of, any health care benefit program, in connection with the delivery of or payment for health care benefits, items, or services, shall be fined under this title or imprisoned not more than 10 years, or both....
- (b) With respect to violations of this section, a person need not have actual knowledge of this section or specific intent to commit a violation of this section.

51

Health Care Fraud (Federal, State & Private)

2. False Statements Relating to Health Care Matters, 18 U.S.C. § 1035. Section 1035 states:

Whoever, in any matter involving a health care benefit program, knowingly and willfully—

- (1) falsifies, conceals, or covers up by any trick, scheme, or device a material fact; or
- (2) makes any materially false, fictitious, or fraudulent statements or representations, or makes or uses any materially false writing or document knowing the same to contain any materially false, fictitious, or fraudulent statement or entry, in connection with the delivery of or payment for health care benefits, items, or services, shall be fined under this title or imprisoned not more than 5 years, or both.

52

Health Care Wire Fraud (Federal, State & Private)

(18 U.S.C. § 1341). Section 1343 states:

- Whoever, having devised or intending to devise any scheme or artifice to defraud, or for obtaining money or property by means of false or fraudulent pretenses, representations, or promises, transmits or causes to be transmitted by means of wire, radio, or television communication in interstate or foreign commerce, any writings, signs, signals, pictures, or sounds for the purpose of executing such scheme or artifice, shall be fined under this title or imprisoned not more than 20 years, or both...

ORS 165.690¹ Definitions for ORS 165.690, 165.692 and 165.694

Text News Annotations Related Statutes

As used in ORS 165.690 (Definitions for ORS 165.690, 165.692 and 165.694), 165.692 (Making false claim for health care payment) and 165.694 (Aggregation of claims):

- Claim for health care payment means any request or demand for health care payment, whether made in the form of a bill, claim form, contract, invoice, electronic transmission or any other document. Claim for health care payment does not include any statement by a person on an application for coverage under a contract or certificate of health care coverage issued by an insurer, health care service contractor, health maintenance organization or other legal entity that is self-insured and provides health care benefits to its employees.
- Health care payment means money paid in compensation for the delivery of specified health care services, whether under a contract, certificate or policy of insurance, by a health care payor.
- Health care payor means:
 - Any insurance company authorized to provide health insurance in this state;
 - A health maintenance organization;
 - A health care service contractor;
 - Any legal entity that is self-insured and provides benefits for health care services to its employees;
 - Any legal entity responsible for handling claims for health care services under a state

The prosecuting attorney shall notify the Oregon Health Authority and any appropriate licensing boards of the conviction of a person under ORS 165.692 (Making false claim for health care payment). [1995 c.496 §5; 2009 c.595 §111]

GRID Charting & Training (c) Mentor Research Institute

56

If you don't have completed chart notes and are not engaged in a focused process to create, complete or re-create those chart notes in adequate form you can be required by law to **repay claims** made by commercial (i.e. private) Healthplans for payer reimbursement and **spend up to 20 years in prison.**

Bottom Line It's a real thing!

57

Professional liability insurance does NOT cover the legal service costs of a provider who is under investigation for allegations of criminal conduct

58

Personal, private and sensitive information necessary to provide psychotherapy can be placed in psychotherapy notes.

Ethical question

Do you have an ethical responsibility to keep personal, sensitive and private information out of a patient's medical record? Why?

59

Personal, private and sensitive information which describes a patient's problems and symptoms should be entered in the patient's medical chart in a way that protects patient privacy.

What goes in the Medical Chart?

60

Ethical question

Personal and private information that is not relevant to the patient's problems and symptoms should be placed in the provider's psychotherapy notes.

Can you assume your patient does not want sensitive information in their medical chart?

GRID Charting & Training (c) Mentor Research Institute 61

61

Psychotherapy Notes

Psychotherapy notes may include information that is in the Medical record and information that may become part of the medical record in the future. (augment the record.)

"Psychotherapy Notes" are granted special protection under HIPAA due to the likelihood they contain particularly sensitive information, and also because they are the personal reflections of the patient or treating therapist.

The primary purpose of psychotherapy notes is to help the psychotherapist recall the therapy discussion, session content, information that is not relevant that may become relevant, is little or no use to others not involved in the therapy at the time the notes were made.

Example of content in training

GRID Charting & Training (c) Mentor Research Institute 62

62

Yale University Minimum Necessary Policy

Medical staff must make a reasonable effort to disclose or use only the minimum necessary amount of protected health information in order to do their jobs. They **can disclose information requested by other health care providers if the information is necessary for treatment.**

Physicians and providers who are directly involved in the care of the patient can see PHI. Providers can disclose to consulting physicians or for referrals, **but not to people who don't have clinical responsibilities.** Physicians must be careful about what they disclose to **other staff members, such as billing department workers** or providers not involved in the care of their patient.

GRID Charting & Training (c) Mentor Research Institute 63

63

Ethical question

Recommended Policy

Do not put anything into a patient's medical record that might do more harm than good.

Use general vs. specific language whenever possible & avoid use of direct quotes of patient statements.

General language examples: interpersonal stress, family conflict, painful memories, distressing recollections of past events, affect regulation, guilt/regret over past behavior, etc.

64

GRID Charting & Training (c) Mentor Research Institute

64

Important

The information placed in a patient's medical chart should be only the minimum necessary for the **legitimate** purposes for which the record may be examined.

An auditor's curiosity about details of the circumstances which create symptoms is not a legitimate purpose.

GRID Charting & Training (c) Mentor Research Institute 65

65

Ethical question

The purpose of a medical chart is NOT to document as much as you can about a patient's personal and private life.

Is it ethical to put in all the sad details?
Not if your ethical goal is to avoid harm and protect privacy.

GRID Charting & Training (c) Mentor Research Institute 66

66

Ethical question

A chart note may be amended with excerpts from psychotherapy notes during or prior to an audit (or other **legitimate** request for information.)

Therapists are writing to 7 masters who have nothing to do with psychotherapy services

GRID Charting & Training (c) Mentor Research Institute 67

67

There are 7 oversight purposes for which charts may be examined. Each is external to psychotherapy, none relate to improvement in patient's progress, outcomes, or satisfaction.

<https://www.mentorresearch.org/value-psychotherapy-charting>

GRID Charting & Training (c) Mentor Research Institute 68

68

7 oversight purposes of chart notes provide no incremental improvement in patient progress, outcomes or satisfaction

1. Billing & claims information
2. Contractual requirements
3. Legal requirements
4. Ethical requirements
5. Clinical thoroughness
6. Medical necessity
7. Practice policies and patient rights requirements

GRID Charting & Training (c) Mentor Research Institute 69

69

6 internal practice purposes that provide no incremental improvement in treatment progress, outcomes or satisfaction

1. that a service was provided to justify charging a fee for that service.
2. that patient/s and psychotherapist discussed pertinent patient history and presenting problems for which services are requested and qualify for reimbursement.
3. pertinent aspects of patient functionality, symptoms, well-being, health, and risk factors which impact provision of an appropriate level of care.
4. information that allows the patient and psychotherapist to define when continuation or termination of care is appropriate.
5. any need for other or additional services.
6. the outcome of services provided.

GRID Charting & Training (c) Mentor Research Institute 70

70

Factors that may increase payer audits of mental health services.

- Annual session limits are no longer allowed.
- Mental health providers lag in adopting EHRs; their practice norms are not as easily analyzed as medical service codes.
- Medical necessity criteria are not well enough documented.
- Mental health professionals often do not meet payer's contract compliance requirements.
- Physicians advocate effectively and collaboratively for their bottom line; mental health professionals do not.
- Pandemic experience has increased public eagerness for psychotherapy services.
- Payers have financial pressures due to increases in overall healthcare expenditures: aging population, pandemic service demands, more medical service options of many types; payers may be motivated to audit mental health providers - who are vulnerable.

GRID Charting & Training (c) Mentor Research Institute 71

71

What is a Designated Record Set?

- ...is a HIPAA privacy rule that defines the **designated record set** as a group of records maintained by or for a covered entity that may include patient medical and billing records; the enrollment, payment, claims, adjudication, and cases or medical management record systems maintained by or for a health plan; or information used in whole or in part to make care-related decisions.

Broader than a Legal Medical Record

GRID Charting & Training (c) Mentor Research Institute 72

72

What is a Legal Medical Record?

- Generally, the information used by the patient care team to make decisions about the treatment of a patient.

Does not include billing data

73

4 Types of Audits

1. Risk Adjustment
2. Abuse Audits
3. Record Keeping
4. Medical Necessity & Appropriateness
 - Failure to document
 - 90837 letters "bring it on"

74

Healthplans provide Treatment Record Review Forms

PacificSource CCO Self Self-Audit Checklist

SELF-AUDIT CHECKLIST WITH GAR REFERENCES

Provider Name: PostDoc/Conducting

Date: _____

Checklist Item	Yes	No	Comments
1. An account is being opened for 10 years after the date of closure for all active cases closed.			
2. The year-end process is timely, accurate, and complete.			
3. An accurate random sampling of accounts will be reviewed for proper and complete processing.			

What documents are required to be reviewed for each item?

Documents (GAR, Experience, etc.)

How to review: (GAR, Experience, etc.)

How to review: (GAR, Experience, etc.)

78

Auditing the Auditor

Mentor Research Institute investigated the Pacific Source Audit. Basically, they audited the auditor.

79

Auditing the PacificSource Self-Audit Checklist Revealed Errors & Omissions

Medical Requirements and Audits

These records are being reviewed for compliance after the date of process for which claims were made.

Auditing the PacificSource Self-Audit Checklist Revealed Errors & Omissions

GRID Charting & Training (c) Mentor Research Institute

82

Auditing Self-Audit Checklists Reveals Errors & Omissions

1. Anyone who contracts with an Oregon Health Plan CCO must adhere to federal and state laws and regulations. (Punishable as a crime.)
2. CCOs are paid by the State of Oregon.
3. CCOs manage behavioral health services in accordance with State and Federal Law.
4. Public behavioral health departments' non-employees are certified by the State to take OHP payments.
5. Private groups can form and contract with CCOs if they have a certificate of authority issued by the State of Oregon.
6. The State of Oregon contracts with individual providers because they do not have enough employees and working for some private groups suck; having case loads of 100 to 150 patients per provider.
7. CCOs are required to audit solo private practice providers. They send providers self-audits to place the burden on the solo practice providers.
8. Providers are auditing themselves using criteria that are incomplete, has errors, and misleads professionals into believing they are compliant.
9. CCOs are protecting their contracts, not the providers' practices.
10. Providers are struggling to understand the legal obligations.

GRID Charting & Training (c) Mentor Research Institute

83

- ...self-audit checklists do not release psychotherapists from responsibility to validate that they are adhering to ALL external oversight requirements?

Did you know that ...

GRID Charting & Training (c) Mentor Research Institute

84

Did you know...

- 66 categories of information are required to meet:
 - the 6 internal OVERSIGHT PRACTICE purposes, and
 - the 7 external OVERSIGHT purposes?

GRID Charting & Training (c) Mentor Research Institute 85

85

3 important facts

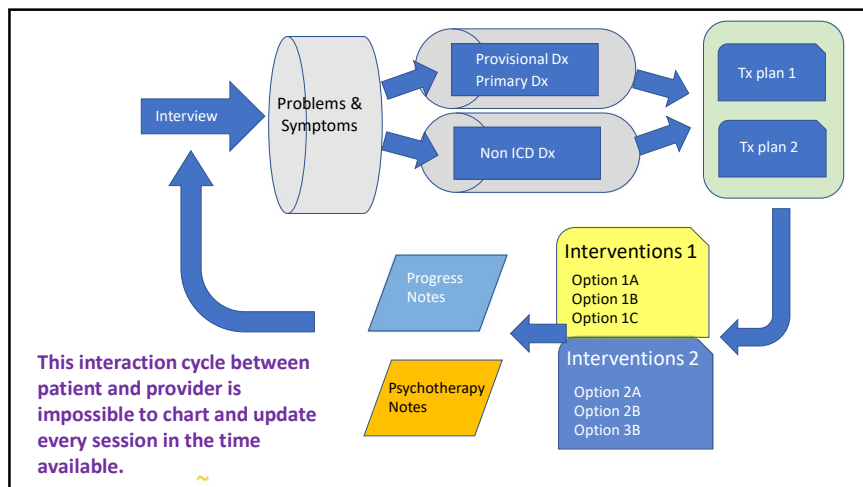

There is no empirical evidence that patients or the public benefit from disclosure of personal, intimate, or private information sometimes required in writing by interests external to psychotherapy.

There are no studies which examine the benefits or harm caused by disclosure of mental health chart notes.

There are many painful anecdotes.

GRID Charting & Training (c) Mentor Research Institute 86

86

87

Is this the way you begin with every patient?

We can't talk about your problems right now.

We must first complete an intake assessment to establish the medical necessity of your treatment and then create a treatment plan ... Then we can set up some goals with measurable objectives that will address your problems.

GRID Charting & Training (c) Mentor Research Institute 88

88

Do you treat a diagnosis or achieve goals that reduce symptom burden and improve functioning?

What can happen when the patient's GOALS ARE directly related to the diagnosis?

```

    graph LR
      A[Problems & symptoms] --> B[Diagnosis (1st appt.)]
      B --> C[Medical necessity]
      C --> D[Goals]
      D --> E[Treatment plan]
      E --> F[Treatment Interventions]
      F --> G[Progress note]
    
```

What happens when the patient's GOALS are NOT directly related to a diagnosis?

```

      F --> G[Diagnosis (3rd appt.)]
    
```

GRID Charting & Training (c) Mentor Research Institute

89

Why do Healthplans want personal, private and sensitive information.

Beginning in the 1970's

- Residential and inpatient treatment programs flourished.
- The cost of mental health care increased dramatically (uncontrolled).
- **Healthplans insisted on reducing costs.**
- The Joint Commission On Accreditation of Hospitals (JCAH) established accreditation standards for psychiatric facilities and substance abuse programs.

GRID Charting & Training (c) Mentor Research Institute

90

There's a S.M.A.R.T. way to write management's goals and objectives

George T. Doran

A characteristic of management excellence is a climate in which company officials find ways to deal with change and allow managers the freedom to reveal themselves as individuals. These twin demands of managing change and satisfying human needs can be accomplished if, and only if, organizations educate their people in the "what" and "how" of writing effective objectives. It's important to understand the unique executive beliefs and philosophies. They are usually of a form that is continuous and long-term. For example: (1) Conduct all corporate activities with

Specific—target a specific area for improvement.

Measurable—quantify or at least suggest an indicator of progress.

Assignable—specify who will do it.

Realistic—state what results can realistically be achieved, given available resources.

Time-related—specify when the result(s) can be achieved.

Notice that these criteria don't say that all objectives must be quantified on all levels of management. In certain sit-

The Joint commission adopted a management by objectives policy developed to manage employees in companies.

91

91

S.M.A.R.T. charting was adopted by hospital business administrators to manage their employees and patients!

Cobbled together based on health care administrative needs totally unrelated to providing care to people with emotional or behavioral problems ...

GRID Charting & Training (c) Mentor Research Institute

92

This little article published in 1981

That HAD NOTHING TO DO WITH TREATMENT changed everything!

Operating managers feel pressure to produce. They are not interested in the future if they believe they are being evaluated on a short-term basis. Busy

31, 1981, an inventory system that will reduce inventory costs by \$1 million, with a cost not to exceed 200 work hours and \$15,000 out-of-pocket initial ex-

Operating managers feel pressure to produce. They are not interested in the future if they believe they are being evaluated on a short-term basis. Busy

“The establishment of objectives and the development of their respective action plans are the most critical steps in a company’s management process.”

GRID Charting & Training (c) Mentor Research Institute

93

93

What is the origin of “S.M.A.R.T.”?

Finally, hold managers accountable for the proper match of their subordinates and their jobs. Require evidence of job fit in performance appraisals as foundation, to management by objectives and all efforts seeking improvement in productivity. And, when you encounter job mismatch, correct it. If you must, remove the employee, move him or her to a more suitable position, or, if that is impossible, seek assistance in outplacement.

People are expensive assets. If a manager has persons in the wrong job, require him to face up to the reality of it, or be penalized. The immorality lies in failing to tackle the problem, not in being soft about it. ■

GRID Charting & Training (c) Mentor Research Institute

94

94

S.M.A.R.T. Goals and Objectives Keep Being Changed by People with Perverse Incentives...

- **S**pecific: Objectives need to be clear and specific, not general or vague. It's easier for a patient to complete objectives when they know exactly what they need to do.
- **M**easurable: Objectives need specific times, amounts or dates for completion so you and your patients can measure their progress.
- **A**ttainable: Encourage patients to set goals and objectives they can meet. If their objectives are unrealistic, it may decrease their self-confidence or discourage them. However, goals and objectives should not be too easy either. Goals should be challenging but also realistic.
- **R**elevant: Goals and objectives should be relevant to the issues listed in the treatment plan. When patients complete objectives and reach their goals, they should be closer to the place they want to be in life and as a person.
- **T**ime-bound: Goals and objectives must have a deadline. Goals might be considered short-term or long-term, while objectives need specific dates to meet. A deadline creates a sense of urgency which helps motivate clients.

GRID Charting & Training (c) Mentor Research Institute

95

95

Why do so many people use SMART charting?

GRID Charting & Training (c) Mentor Research Institute

96

96

97

Is this a real thing?

“I strongly encourage the use of SMART goals on Service Plans to be compliant with this OAR: Specific, Measurable, Achievable, Realistic, and Time-based. (the manager was referring to [OAR 410-172-0630 (2)(c)])”

Email communication with the behavioral health quality manager of an Oregon Coordinated Care Organization (CCO).

GRID Charting & Training (c) Mentor Research Institute

98

98

Quality of care (defined as efficiency and cost effectiveness) was evaluated based on adherence to a process like this for each patient:

1. **S**tatements of clearly defined problems and needs
2. **M**easurable goals and objectives.
3. **A**chievable outcomes based on the frequency of care, treatment, and services.
4. **R**eports about those objectives sufficiently specific to evaluate the patient's progress, expressed in behavioral terms that specify measurable indices of progress.
5. **T**imely attention to goals and objectives, re-evaluated and, when necessary, revised; recorded at intervals established by organization policy.

GRID Charting & Training (c) Mentor Research Institute

99

99

True or False?

S.M.A.R.T. charting borrowed a concept based on the **management by objectives** (MBO) model created for the purpose of managing, supervising and removing employees who did not meet employers' performance objectives.

GRID Charting & Training (c) Mentor Research Institute

100

100

True or False?

S.M.A.R.T. charting is now used in residential and inpatient treatment programs that require behavioral health staff to engage in a relay race, passing the "baton" from one shift to the next shift.

101

SMART Charting is not SMART

S.M.A.R.T. (Dorin, 1981)

Business (Manage By Objectives)

- Specific - targets and areas for improvement.
- Measurable - suggest indicators of progress.
- Assignable - specify who will do it
- Realistic - what can be achieved with resources.
- Time related - when results will be achieved.

S.M.A.R.T. (SAMSHA, 2021)

Business (Management by Objectives)

- Specific - Objective clearly states, so anyone reading it can understand, what will be done and who will do it.
- Measurable - Objective includes how the action will be measured. Measuring your objectives helps you determine if you are making progress. It keeps you on track and on schedule.
- Achievable - Objective is realistic given the realities faced in the community. Setting reasonable objectives helps set the project up for success
- Relevant - A relevant objective makes sense, that is, it fits the purpose of the grant, it fits the culture and structure of the community, and it addresses the vision of the project.
- Time-bound - Every objective has a specific timeline for completion.

102

SMART is no longer SMART

SMART (Dorin, 1981)

Business (Manage By Objectives)

- Specific - targets and areas for improvement.
- Measurable - suggest indicators of progress.
- Assignable - specify who will do it
- Realistic - what can be achieved with resources.
- Time related - when results will be achieved.

SMART (Griswold, 2021)

Clinical (Opinion during CE)

- Specific - number and quantities for objectives.
- Measurable goals - behaviors and scores.
- Attainable - is it realistic?
- Relevant - related to a diagnosis.
- Time limited - deadlines to ensure clients are meeting targets.

SMART (SAMSHA, 2021)

Business (Management by Objectives)

- Specific - Objective clearly states, so anyone reading it can understand, what will be done and who will do it.
- Measurable - Objective includes how the action will be measured. Measuring your objectives helps you determine if you are making progress. It keeps you on track and on schedule.
- Achievable - Objective is realistic given the realities faced in the community. Setting reasonable objectives helps set the project up for success
- Relevant - A relevant objective makes sense, that is, it fits the purpose of the grant, it fits the culture and structure of the community, and it addresses the vision of the project.
- Time-bound - Every objective has a specific timeline for completion.

103

True or False?

S.M.A.R.T. charting is now pushed as the defacto psychotherapy documentation standard for auditing by Healthplans and insurance payers.

104

Can you create a bullet proof treatment record that would make an auditor swoon?

105

A bullet proof treatment record that would make an auditor swoon requires...

1. A problem and symptoms list used to make a diagnosis that justifies treatment.
2. The treatment plan which includes a set of interventions, based on a provisional diagnosis, to treat problems and symptoms.
3. Interventions include sets of treatment options selected and used to treat problems and symptoms.
4. Progress notes are created to document treatment options that may be used and to measure change by observations, conversation and/or questionnaires.

106

The GOLDEN THREAD

Used almost exclusively by Community Behavioral Health Programs
with a Certificate of Approval by the OHA

The "golden thread" refers to how the problems and symptoms from an assessment (interview and screening) lead to a provisional diagnosis and the initial treatment plan, which should then be reflected in the treatment and progress notes. This is a slight variation on SMART charting strategy.

107

Contrasting the Golden Thread with Reality

Golden Thread

- Intake assessment clearly identifies an appropriate clinical problem and corresponding diagnosis.

In Reality

- Ascertaining appropriate focal symptoms and/or problems can take weeks or months.
- The initial diagnosis is often uncertain, can take weeks to arrive at, and can change over time.

108

Golden Thread

- Each goal should have specific interventions prescribed that reflect best practices and evidenced-based treatments to help guide the client along the path to recovery.

In Reality

- Inpatient services require specific goals and interventions that can be assigned to a wide range of behavioral and mental health providers who work with the patient 24/7 in a controlled setting. Continuity of care requires specificity.
- Outpatient services provided by one person can be 32 hours of service over 8 months in an uncontrolled setting. Treatment approaches and goals can change between appointment.

GRID Charting & Training (c) Mentor Research Institute

109

109

Depression example

- Each note should lead into the next, demonstrating the client's progression through treatment.
- 0=Never... Depression has been a problem since last appointment.
- 1=Almost never... Depression has been a problem since last appointment.
- 2=Less than half the time... Depression has been a problem since last appointment.
- 3=Half the time... Depression has been a problem since last appointment.
- 4=More than half the time... Depression has been a problem since last appointment.
- 5=Almost every day... Depression has been a problem since last appointment.
- 6=Every day... Depression has been a problem since last appointment.

GRID Charting & Training (c) Mentor Research Institute

110

110

Ethical question

- The Golden Thread is important for compliance and reimbursement.
- The Golden Thread can also be an important tool for delivering quality care.
- There is no evidence to support this assertion.
- The Golden Thread is a myth formulated for inpatient treatment and imposed on outpatient treatment without evidence.

GRID Charting & Training (c) Mentor Research Institute

111

111

What contractors are part of UPIC nationally?

- Medicare Administrative **Contractors** (MACs),
- Supplemental Medical Review **Contractor** (SMRC),
- Recovery Audit **Contractors** (RACs), and the.
- Comprehensive Error Rate Testing (CERT) **Contractor**.

GRID Charting & Training (c) Mentor Research Institute

112

112

What triggers an RAC audit?

RAC looks for both **overpayments** made to patients (i.e. providers) and **underpayments** made to providers (by hospitals and groups).

1. While many **RAC audits** do uncover fraud, it is important to note that innocent mistakes or errors in documentation can also **trigger an audit**.
2. **Private contractors will demand correction of the payment.**

113

How are RACs paid?

- **Medicare** RACs are paid **on a contingency fee basis**, receiving a percentage of both the over- and underpayments they correct.
- **Medicare** RACs perform **audit** and recovery activities on a postpayment basis, and claims are reviewable up to 3 years from the date the claim was filed.

114

What is Medicaid Abuse

Ethical question

- **Medicaid abuse** occurs when a member or provider engages in activity that results in unnecessary cost, including services that are not necessary or services that do not meet the standards of care.
- Examples of **Medicaid abuse**: **Billing for services that are not necessary.**

115

Complaint referral to UPIC

- “Claims have been up-coded to obtain a higher reimbursement amount and appear to be fraudulent or abusive; “

Medicare Program Integrity Manual Chapter 1 - Medicare Improper Payments: Measuring, Correcting, and Preventing Overpayments and Underpayments

116

Complaint referral to UPIC Ethical question

- “Potential misrepresentation with respect to the nature of the services rendered, charges for the services rendered, identity of the person receiving the services, identity of persons or doctor providing the services, dates of the services, etc.;

Medicare Program Integrity Manual Chapter 1 - Medicare Improper Payments: Measuring, Correcting, and Preventing Overpayments and Underpayments

117

Complaint referral to UPIC

- “Alleged submissions of claims for non-covered services are misrepresented as covered services, excluding demand bills and those with Advanced Beneficiary Notices (ABNs);”

Medicare Program Integrity Manual Chapter 1 - Medicare Improper Payments: Measuring, Correcting, and Preventing Overpayments and Underpayments

118

Complaint referral to UPIC

- “Alleged alteration of claim history records to generate inappropriate payments;”

119

What can auditors do?

- “When auditors conduct statistical sampling for overpayment estimation as specified in PIM chapter 8, they shall extrapolate the sampling results to the known universe of similar claims when calculating the projected overpayment or underpayment amount.”

CMS guidelines as of October 2, 2020

120

What can auditors do?

- “Auditors have the discretion to conduct the postpayment review onsite at the provider’s location.”

CMS guidelines as of October 2, 2020

121

"Progress Notes" are...

- “...visit notes, encounter notes, Evaluation and Management documentation, office notes, face-to-face evaluation notes or any other type of record of the services provided by a physician or other licensed/certified medical professional (LCMP) in the medical record.”

CMS guidelines as of October 2, 2020

122

"Progress Notes"

Important

- “...may be in **any form or format**, hardcopy or electronic.”

Ethical question

CMS guidelines as of October 2, 2020

123

Important

- Template – “a.. tool/instrument/interface that **assists in documenting a progress note.**”

- CMS guidelines as of October 2, 2020

124

Auditors look for...

- “**Patterns and trends** that may indicate potential fraud.”

CMS guidelines as of October 2, 2020

125

“The CERT reviewers shall review every line on the **randomly selected claim** that affects payment to determine if the following types of requirements are met:

1. **Coding** requirements;
2. **Benefit** category requirements;
3. The **reasonable and necessary** requirements.”

CMS guidelines as of October 2, 2020

126

What are reasonable and necessary requirements?

127

This class of information does not qualify as psychotherapy note material.

- Progress notes and psychotherapy notes have important but distinct purposes. **Psychotherapy notes** are psychotherapists private notes taken down during sessions. They're used primarily as a memory aid and include information like your hypothesis on a potential diagnosis, observations, and impressions related to the patient's unique needs or circumstance.
- **Progress notes**, by contrast, are the official record of each therapy session. They're **meant to be shared with other members of the patient's care team and insurers when requested**. Progress notes include information such as diagnoses, interventions used, and progress toward treatment plan goals.

128

“In certain situations, it is appropriate for contractors to up code or down code a claim (or items or services on a claim) and adjust the payment. When the medical record supports a higher or lower level code, the MACs, SMRC, CERT, UPICs and Recovery Auditors shall not deny the entire claim but instead shall adjust the code and adjust the payment.”

CMS guidelines as of October 2, 2020

GRID Charting & Training (c) Mentor Research Institute

129

129

True or False?

“The False Claims Act (“FCA”) provides, in pertinent part, that: (a) Any person who (1) knowingly presents, or causes to be presented, to an officer or employee of the **United States Government** or a member of the Armed Forces of the United States a false or fraudulent claim for payment or approval; (2) knowingly makes, uses, or causes to be made or used, a false record or statement to get a false or fraudulent claim paid or approved by the Government; (3) conspires to defraud the Government by getting a false or fraudulent claim paid or approved by the Government; . . . or (7) knowingly makes, uses, or causes to be made or used, a false record or statement to conceal, avoid, or decrease an obligation to pay or transmit money or property to the Government,…”

- 31 U.S.C. § 3729.

Important

GRID Charting & Training (c) Mentor Research Institute

130

130

True or False?

Under Federal Law...

“(b) For purposes of this section, the terms “knowing” and “knowingly” mean that a person, with respect to information (1) has actual knowledge of the information; (2) acts in deliberate ignorance of the truth or falsity of the information; or (3) acts in reckless disregard of the truth or falsity of the information, and no proof of specific intent to defraud is required.”

- 31 U.S.C. 3729(b)

GRID Charting & Training (c) Mentor Research Institute

131

131

True or False?

Treatment plans are what the therapist plans to do in sessions and includes homework assignments to be given to clients.

There is no requirement to document that plan before the appointment in order to “steer” the appointment.

GRID Charting & Training (c) Mentor Research Institute

132

132

True or False?

Templates are acceptable in paper and electronic forms.

GRID Charting & Training (c) Mentor Research Institute 133

133

True or False?

Ethical question

A "cookie-cutter" means the same treatment plan and progress notes for every patient.

Important

Example of content in training

GRID Charting & Training (c) Mentor Research Institute 134

134

True or False?

You can document what you routinely do, even what you do in every session.

GRID Charting & Training (c) Mentor Research Institute 135

135

True or False?

Providers must document something new every few sessions.

GRID Charting & Training (c) Mentor Research Institute 136

136

You need not document something new if nothing significantly new happened.

Important

True or False?

137

True or False?

You may amend your medical record at a later date based on your psychotherapy notes.

138

True or False?

You are not required to document everything said in a session.

Important

139

True or False?

You should document the patient's medical record everything..

1. that is legally required,
2. reasonably necessary to document the services provided, and
3. reasonably necessary to pass an audit.

140

What must you date and when?

-  You should not back date.
-  You can update the treatment plan.
-  You can create a treatment plan without a date.
-  You can create a treatment plan when you have enough information to do that.

GRID Charting & Training (c) Mentor Research Institute 141

141

True or False?

In couples therapy, you can't have two identified patients.

GRID Charting & Training (c) Mentor Research Institute 142

142

True or False?

Rather than "couples therapy" (CPT 90847) it is easier to bill as a 90837 with one identified patient.

GRID Charting & Training (c) Mentor Research Institute 143

143

True or False?

You can be required to provide documentation when you submit an out-of-network claim to a Healthplan payer only if you have a single case agreement.

GRID Charting & Training (c) Mentor Research Institute 144

144

True or False?

Proceeding with treatment using a diagnosis for which you have low confidence is acceptable **if you document your confidence level.**

Example of content in training

GRID Charting & Training (c) Mentor Research Institute 145

145

True or False?

Screening questionnaires can be used as **evidence** for a decision to treat or not treat a patient.

GRID Charting & Training (c) Mentor Research Institute 146

146

True or False?

You must have a documented treatment plan for all your patients in your medical record.

GRID Charting & Training (c) Mentor Research Institute 147

147

True or False?

You are required by **Federal Regulations** to have a treatment plan if you bill Medicare and/or Medicaid.

GRID Charting & Training (c) Mentor Research Institute 148

148

True or False?

You are required by **Oregon State Statutes and Regulations** to create a treatment plan.

GRID Charting & Training (c) Mentor Research Institute 149

149

Why do we resist creating S.M.A.R.T treatment plans and progress notes?

THEY ARE NOT HELPFUL.

GOALS AND OBJECTIVES ARE CONFINING.

BECAUSE THERAPISTS DON'T LIKE DOING THINGS THAT DON'T MAKE SENSE.

WE KNOW THEY MAY HARM OR NOT IMPROVE OUTCOMES.

THERE IS NO EVIDENCE THEY IMPROVE OUTCOMES OR PATIENT SATISFACTION.

GRID Charting & Training (c) Mentor Research Institute 150

150

Assertions others make about Tx plans without evidence:

- Treatment plans can help patients:
 - Avoid feeling overwhelmed by setting goals
 - Stay motivated, achieve more, boost self confidence feel more satisfied with treatment
 - Monitor progress and demonstrate t to clients
 - Demonstrate progress and need for treatment to insurance
 - Build rapport, as client/therapist collaborate on vision

GRID Charting & Training (c) Mentor Research Institute 151

151

Restoring the “special ingredient” to charting

GOAL

Reduce compulsive eating when anxious

OBJECTIVES

- Ct. will learn (and report using) 2 tools to deal with anxiety instead of eating
- Ct. will keep log of emotional eating, to gather info about behavior (triggers, frequency, progress)
- Ct. will report emotional eating no more than once weekly

INTERVENTIONS

- Weekly individual CBT therapy
- Explore history of disordered eating/secondary gains, help identify distorted cognitions and emotional triggers
- Teach ct. techniques to deal with anxiety, including mindfulness, meditation, journaling, breathing exercises, and progressive relaxation
- Therapist will help ct. write relapse prevention plan, outlining how to use new coping skills instead of eating

Meta-Objectives
 Client-Centered focus
 Gestalt shift
 Perceptual shifting
 Somatic therapy
 Emotion focused, etc..

Therapist-Patient Alliance

GRID Charting & Training (c) Mentor Research Institute 152

152

True or False?

Patients are entitled to unlimited sessions.

GRID Charting & Training (c) Mentor Research Institute 153

153

True or False?

Patients may receive unlimited sessions that are medically necessary.

GRID Charting & Training (c) Mentor Research Institute 154

154

True or False?

1 intervention in a treatment plan is enough.

GRID Charting & Training (c) Mentor Research Institute 155

155

True or False?

3 treatment options in an intervention plan are enough.

GRID Charting & Training (c) Mentor Research Institute 156

156

Types of Audits

1. Risk Adjustment Abuse audits
2. Record keeping
3. Medical necessity
 - 90837 letters

GRID Charting & Training (c) Mentor Research Institute

157

157

Risk Adjustment Audits

- Conducted annually.
- Comes in a letter from a contractor acting on behalf HHS.
- Required by HHS to assess risk pool of insurers.
- It is not clear if there is any penalty or retribution if an individual provider does not comply.
- Do not provide information without the patient's permission.

GRID Charting & Training (c) Mentor Research Institute

158

158

What defines "medically necessary"? (According to CareOregon CCO)

Please include the following documentation with every authorization request:

Current and valid **Mental Health Assessment** that includes:

- Clinical justification for the DSM 5 diagnosis that is a covered diagnosis on Oregon's prioritized list.
- Explanation of the medical need for the services.

Current and valid **Service Plan** that includes:

- Individualized plan that describes the member's condition and services that will be needed.
- Specific and measurable goal(s) of services.
- Expected outcome(s) and duration of the services.

A brief clinical reason for the request (entered here or as an attachment):

9

159

"Medically Necessary" Providence Healthplan - Oregon

- Services that do not meet Medically Necessary criteria will not be covered.
 - Example: Your provider suggests a treatment using a machine that has not been approved for use in the United States. We probably would not pay for that treatment.
 - Example: You go to a hospital emergency room to have stitches removed, rather than wait for an appointment in your doctor's office. We would not pay for that visit.
 - Example: You stay an extra day in the Hospital only because the relative who will help you during recovery can't pick you up until the next morning. We may not pay for the extra day.
- Although a treatment was prescribed or performed by a Qualified Practitioner, it does not necessarily mean that it is Medically Necessary under our guidelines. Obtaining confirmation of coverage from Providence Health Plan beforehand is always recommended.

“Medically Necessary” Providence Healthplan - Oregon

What Is Defined In a Behavioral Health SEOC?

Each SEOC has a profile name and a short description of services in the episode of care. Below is an example of the information in an SEOC for the BHMM6MO profile. This template is for a 6-month outpatient authorization. General coverage details include a description, date and covered services. This information is in each authorization letter.

Outpatient Individual Psychotherapy - 6 month SEOC 1.15.3

Description: This authorization covers services associated with all medical care listed below for the referred condition.

Duration: 180 Days

Overview:

1. Evaluation for the referred condition indicated on the consult
2. Individual psychotherapy services to include evidence based counseling and psychological testing/assessment
3. Inpatient or observation emergent admission if clinically necessary

Note: The recommended frequency is one visit per week, unless the Veteran has clinically urgent needs that require a short-term, higher frequency of visits.

Note: VA notification is required if emergent procedure is necessary. Please contact your Facility Community Care Office within 72 hours who initiated the outpatient referral so that the appropriate notification can be made on behalf of the Veteran.

SEOC: Standardized Episodes of Care

What defines “medically necessary”? (According to CMS/Medicare)

1. Medically appropriate services rendered or made available to a member for treatment of a behavioral, mental health or substance use disorders diagnosis.
2. Safe, effective and appropriate for the member based on standards of evidence-based practice generally recognized by the relevant scientific or professional community based on the best available evidence;
3. Appropriate and consistent with the diagnosis identified in the behavioral and mental health assessment;
4. Provided in accordance with an individualized service plan and appropriate to achieve the specific and measurable goals identified in the service plan;
5. Not provided solely for the convenience or preference of the member, the member's family, or the provider of the service item or supply;
6. Not provided solely for recreational purposes; Not provided solely for research and data collection;
7. Not provided solely for the purpose of fulfilling a legal requirement placed on the member; and
8. The most cost effective of the covered services that can be safely and effectively provided to a member.

What is medically necessary?

6. Not provided solely for recreational purposes; Not provided solely for research and data collection;

165

What is medically necessary?

8. The most cost effective of the covered services that can be safely and effectively provided to a member.

166

What is a "Special Investigations Unit?"

- Looking for evidence of fraud or abuse.
- Therapists have less ability to avoid providing information.
- Can follow or replace regular reviews.

167

How do you respond to a request for audit if you are out of network?

- Out of network means you have no contract with the insurance payer.
- The contract is between the patient and the payer.
- The patient must give you a release to send the records.
- The patient may be denied reimbursements or further reimbursement.

168

Privacy Exception

- Patient does not want their records to contain sensitive information.
